SKILLS

Programming

Python • Bash • Rust

Security

OSINT

Static Analysis

Dynamic Analysis

Malware Analysis

Penetration Testing

Vulnerability Triage

Tools

• Burp Suite • Frida
• YARA • Wireshark
• Nmap • Hydra
• Autopsy • Volatility
• FTK-Imager

Platforms

• Linux • Docker
• Git • Virtualization

TALKS

Java & Smali: Bridging the Gap

youtu.be/NyuJ_lK6QsU

DEF CON Groups VR
(DCGVR) — Aug 2024

Explained structural and syntactic similarities between Java and Smali for Android reverse engineering.

EDUCATION

NFSU, India

MSc in Digital Forensics
& Information Security
2025 – 2027 (Ongoing)

GGSIPIU, Delhi

BCA | CGPA: 7.64
2020 – 2023

St. Xavier Sr. Sec. School

Senior Secondary
2020

SUMMARY

Security professional with hands-on experience in privacy and application security analysis, offensive security workflows, and OSINT-driven investigations. Skilled in static and dynamic analysis, vulnerability triage, digital forensics, and security automation using Python and Rust. Currently pursuing an MSc in Digital Forensics and Information Security.

EXPERIENCE

Privado.ai, Remote

Security Researcher (Privacy)

June 2023 – August 2023

- Analyzed code across 100+ Android applications using static analysis tools, including Privado.
- Performed dynamic analysis using Frida and Burp Suite to validate data flow and privacy weaknesses.
- Built Python scripts to filter and categorize vulnerability findings, improving triage speed and consistency.
- Presented analysis insights to stakeholders to support privacy-focused product decisions.

PROJECTS

Saber

github.com/AYAN-AMBESH/Saber

- Built a Python-based antivirus prototype that uses YARA rules for malware detection and cleanup.
- Added malware quarantine capability; researching live signature enrichment via CTI and IOC feeds.

Shovel (Rusty_carvey)

github.com/AYAN-AMBESH/Rusty_carvey

- Developed a cross-platform file carver in Rust for unfragmented PNG recovery (~90% accuracy).
- Optimized scanning and parsing flow for faster evidence recovery on large input files.

Portfolio (Linux-style Interface)

github.com/AYAN-AMBESH/portfolio

- Built an interactive portfolio website using JavaScript to emulate a Linux terminal environment.
- Designed command-style navigation to improve engagement and demonstrate scripting workflow concepts.
